

BLOCKBOT

AI BOTS ECOSYSTEM

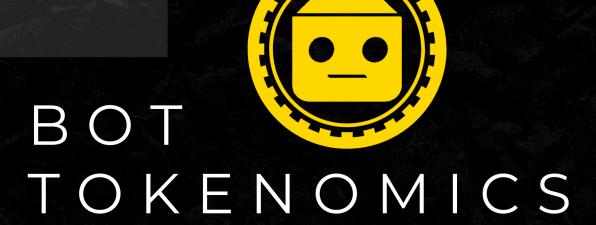

INTRODUCTION

BlockBot is an innovative blockchain project that aims to create a decentralized ecosystem for Al bots. The platform will enable users to access a variety of Al bots and applications, which can be utilized for various purposes such as content creation, process automation, and entertainment. BlockBot will utilize the Binance BNB Chain to ensure fast, secure, and cost-effective transactions. The native utility token of the BlockBot platform is the BOT token, which will serve as the primary means of accessing and interacting with the Al bots in the ecosystem.

THE BLOCKBOT ECOSYSTEM

The BlockBot ecosystem is designed to be a network of interconnected AI bots and applications, where developers can create, add, and monetize their AI bots. Users can either pay to access individual BlockBots using BOT tokens or stake their BOT tokens to access premium BlockBots in the ecosystem. This model fosters innovation and competition among developers, as they will be motivated to create high-quality AI bots to attract users and generate revenue.

The BOT token will serve as the primary currency for accessing and using AI bots within the BlockBot ecosystem. Developers will receive BOT tokens as payment for their AI bots, creating a circular economy where the demand for and value of the BOT token are directly linked to the growth and success of the BlockBot ecosystem.

A total of 100 Billion BOT tokens will be minted on the Binance BNB Chain. 89% of the BOT supply (88,888,888,888) will be sold in presale to ensure the community holds the majority of the tokens. 11% is reserved (11,111,111,112) for liquidity, listing fees, and community rewards.

ROADMAP

The BlockBot project has set forth the following roadmap

Q2 2023: Platform Development and Token Sale

Q3 2023: Launch of the BlockBot Ecosystem (Beta)

Q4 2023: Official Launch of the BlockBot Ecosystem

Q1 2024: Expansion of the AI Bot Network

Q2 2024: Integration with Third-Party Services

Q3 2024 and beyond: Continuous Improvement and Growth

FUTURE DEVELOPMENT

The funds raised from the token sale will be utilized for the development of new AI bots, as well as the continuous improvement and expansion of the BlockBot ecosystem. The project's primary goal is to create an extensive network of AI bots that cater to a wide range of use cases and industries, providing users with unparalleled access to cutting-edge AI technology.

BlockBot is poised to revolutionize the Al industry by creating a decentralized ecosystem that connects users with a diverse array of Al bots and applications.

Through its innovative token distribution model and robust tokenomics, BlockBot aims to incentivize both users and developers to participate in and contribute to the platform's growth. By leveraging the power of blockchain technology and the Binance BNB Chain, the BlockBot project will provide a secure, scalable, and cost-effective solution for accessing Al technology.

As the platform continues to evolve and expand its offerings, BlockBot will remain committed to fostering innovation and collaboration within the AI and blockchain ecosystems. By empowering developers and users alike, BlockBot will play a pivotal role in driving the adoption of AI technology and shaping the future of AI bot ecosystems.

DISCLAIMER

Blockbot, including but not limited to the overall project, token, website, smart contracts and any apps as presented in this conceptual paper is not a licensed, unlicensed or exempted financial or payment service of any kind and in any jurisdiction. Any terminology used in this whitepaper, on the website or within the app is intended only as a basic reference, without any effective or legal meaning of the same terms in a regulated and/or financial environment. The Blockbot smart contracts are open-source, security-audited and permanent. The token is strictly a utility token in all jurisdictions and is not and cannot be considered to be a "security" or otherwise regulated token of any kind. The token is not in any way e-money and/or fiat money, or an asset backed stablecoin, whether global or limited in scope.

This whitepaper taken by itself is not a contract or a contractual agreement of any kind, nor is it an invitation, solicitation or offer to invest in the token or acquire or use tokens in any way and with any expectation of profit therefrom. Any user of Blockbot represents and warrants that such user has received appropriate technical, administrative, regulatory and legal advice before and after accessing and/or reading this whitepaper or the website, and/or using any portion or element of Blockbot, including the token. The user hereby acknowledges and accepts that there is an inherent high risk in accessing, acquiring or using any kind of blockchain and/or crypto system, token, platform, software or interface, including Blockbot and further disavows any claim of any kind against any community member directly or indirectly involved with Blockbot, for any damage suffered, including total loss.

All names, characters, and incidents portrayed in this project are fictitious. No identification with actual persons (living or deceased), places, buildings, and products is intended or should be inferred.
